

3-D

WHAT WILL 3-D DO FOR YOUR LIVESTOCK?

- 3-D is a multi-use fiber pellet that can be used for cattle, sheep and goats to increase fill, rib shape and depth of rib.
- When you need to keep intake low or feed at maintenance, 3-D can be incorporated into the diet to help achieve that goal.
- 3-D will help decrease overeating on higher energy diets when starting cattle on feed.
