

## WHAT WILL **SWAMP WATER** DO FOR YOUR SHOWPIG?

- Swamp Water will increase water intake by utilizing a complex and effective blend of sodium and minerals which is proven to maximize water retention in the cells.
- Due to absence of sugars, Swamp Water will allow your animal to reach maximum hydration without the risk of lactic acid build up in the muscle.

### **FEEDING DIRECTIONS:**

Incorporate 1-2oz of Swamp Water into dry feed  
5 days prior to show day

*\*Allow animals free access to water*

## WHAT WILL **TIDAL WAVE** DO FOR YOUR SHOWPIG?

- Tidal Wave is the ultimate tool which allows effective delivery of complex carbohydrates for the desired shape and expression for the individual animals needs.
- Tidal Wave is designed to allow you to customize to an individual pig's needs for definition and desired look without sacrificing stamina.

### **FEEDING DIRECTIONS:**

Incorporate 1 scoop of Tidal Wave in dry feed or 8oz of water  
24-48 hours prior to the show

*\*1 scoop of Tidal Wave = 500ml Dextrose*

# Pro Tip:

WHEN GOAL IS TO ACHIEVE MAXIMUM SHAPE AND EXPRESSION, FOLLOW BELOW 5 DAY FEEDING RECOMMENDATION

### DAY 1-3

1-2oz Swamp Water in dry feed

### DAY 4

1-2oz of Swamp Water and 1oz Tidal Wave in dry feed

### SHOW DAY

12 hours prior to the show - 1-2oz Swamp Water and 1oz Tidal Wave in dry feed.

Following the 12 hour mark, feed an additional 1-2oz of Tidal Wave every 3-4 hours as needed in dry feed or in 8oz of water
